

# Black Africans

## What is to be done NO.15

September, 2015

*“Men are never convinced of your reasons, of your sincerity, of the seriousness of your sufferings, except by your death. So long as you are alive, your case is doubtful; you have a right only to their scepticism.”*

– *Albert Camus, the fall*“

*“I'm rightly tired of the pain I hear and feel, boss. I'm tired of being on the road, lonely as a robin in the rain. Not never having no buddy to go on with or tell me where we's coming from or going to or why. I'm tired of people being ugly to each other. It feels like pieces of glass in my head. I'm tired of all the times I've wanted to help and couldn't. I'm tired of being in the dark. Mostly it's the pain. There's too much. If I could end it, I would. But I can't.”*

– *Stephen King, the Green Mile*

The current media and political, scramble to score points has shown us the so called humanitarian world and the reach European countries, and their stooges the so called refugee agencies their true image. This image is not new for us African genuine refugees it has been there always, and will be unless we do take action that will eliminate the root causes of refugee production. Which is war and conflict. Which will profit the reach countries and their puppet local authoritarian eginmes.

The current crisis of refugees walking from one European country in a normal climate to reach to Germany and Austria maximum 2000 kms. Is not a big crisis comparing to what happened is happening to genuine African refugees

**in the Saharan and Sinai desert, being beaten, raped, their bodies mutilated, and marketed for organ transplant in the desert.**

**Where ever we go we are for sell, from the time of slavery to the current refugee crisis.**

**Recently a few months back in Liblia, Ethiopian and Eritrean asylum seekers were murdered by ISIS in inhuman way and their bodies also burned. Did Europe and America cry for this? No. why should they? We are less human for them comparing people of Middle East and Asia.**

**Concerning the killings of African, in Libya and death in Mediterranean Sea to have dialogue I have organized " A public forum" hopping to initiate debate and dialogue on the issue. Here where I live in Wellington, New Zealand in the month of June this year. I am shocked by the turn out of less than 10 people. Not long after from this event I attended a form of "activists" and I raised the issue of Africa I was ignored.**

**These shows to me my long time belief of African's are the only people who can find a solution to our own problems. We shouldn't look anywhere else.**

**Recently in July this year the US president went to Ethiopia where the authoritarian regime has been claiming for the last about 25 years " won the election more than 95% " this year "100%" where more than 50,000 oppositions activists, journalists are languish in prisons without any crime. Obama and his staff danced on the grave of murdered prisoner tortured Ethiopians. Endorsing and praising the authoritarian regime.**

**Leader's of authoritarian regimes in Africa are partners with rich countries of East and West, with USA, UK, France, Germany, China, Russia and others. They "produce" war, conflict, genocide, eplotation, refugees, violation of human rights and refuges.**

**The American war machine, AFRICOM, CIA in Africa killing innocent people, for their greedy interest, in collaboration with the continents brutal regimes.**

The sell of ancestral land to Indian, China, USA, UK, Pakistan farming companies, without any compensation to the owners of the ancestral land. In Ethiopia alone the land are equal to Belgium and Israel is given as a "lease" for 99 years. The ancestral land owners farmers of the land who opposed this were killed, tortured, the rest left the country as refugees.

In the big cities of Ethiopia, which the government blowing a trumpet of "double digit economic growth" where it evicted owners of residential houses, business premises from their own property and land. To pave the way for the construction of foreign and 6% of the 96 million Ethiopians who are the members the minority of the regime and the same ethnic group members.

This people who are forced to flee the country. People who are stripped of their land and country. Ethiopia is one of the examples.

What is the use of life if you don't have a right to exist with a very minimum of survival in your own country?

When your country becomes prison, torture camp, starvation death. While few are having luxury in our starving body. When the rich countries talking about "democracy, human right, dignity, the rule of law... ." means on practice their their countries interest.

This are the main issues of refugee production out of Africa.

The so called "African Union" has became instrument of imperialism. This is dangerous time for global humanity. Imperialism and its allies are doing anything to control the resources of the continent more than before.

This time any global system is not able to work anywhere for the majority of humanity. The world is in war but they don't call it "world war"

Because it is not in their back yard of rich countries. One of the profitable commodities the rich countries profit by exporting to poor countries is war.

**We black African are not counted as human being to the rich countries of the world.**

*‘The European Commission gave 2.2 billion euros to its members for refugee-related matters from 2007-2011. But 50 per cent of that money was spent creating fences, surveillance infrastructure and the employment of border guards to keep out the unwanted radicalized “horde”*

*In spite of the widespread knowledge of the drowning of Afrikans in the Mediterranean, it was the September 2015 drowning death of the Syrian child Alan Kurdi that spurred the politicians into action on the matter of the refugee crisis.*

*In August 2014, a similar photo of an unnamed Afrikan child was circulated in the media. The child drowned after the boat in which she was travelling capsized. The conscience of the world went to sleep on this death.”*

*Dr. Ajamu Nangwagwaya, September 23, 20015*

**We black Africans have to open our eyes and ready for protracted peaceful struggle**

**To remove any domination by foreign forces.**

**In order to do that first we have to know who our real enemies and friends are and collaborate with genuine activist, progressive groups, organizations and individuals; people of African descent and non African origin around the globe. The leadership for this movement must be in the hands of native black Africans, in this note keeping eye on Janus-faced native black Africans, who are like chameleons.**

**After this the main task is to start the global movement. Opposing protesting, using every avenue except physical, violence and war. The main and difficult task is to remove the domination of forging forces from our mother continent.**

**Once we remove the foreigners from the continent we move to replacing the authoritarian regimes from Africa. For this we need to fully revive and strength the Pan-African organization to lead the global affairs in a democratic way.**

**Everyone around the globe knows that the global institutions are not working.**

**The so called "UN" is rotten rusty, and expired. That is why after 70 years, the largest human right violator the Saudi Arabia regime became the current" Chair for the UN Human right council"**

**Is there any dirty game than this?**

**Reading and keeping quite is not a solution, let's have a dialogues on the issues.**

**Yilma Tafere Tasew**

**September, 2005**
