

## **EPRDF's permanent damage on the country it rules.**

By ababor ( Abebe A. Birru)

It seems odd for citizens of Ethiopia to accuse the government for seceding a part of their territory to a neighboring country, without the consent of the people and the parliament.

However strange it may seem, the Ethiopian regime, is poised to give away a prosperous and a very rich tract of land along the Sudan boarder, where Emperor Yohannes 4th lost his life Teodros 2nd had spent his youth protecting that ancestral land.

Yes ! this regime has done much harm in its deliberation to govern the country. In our recent memory, we recall TPLF advocating and sponsoring the dismemberment of Eriteria from the mother land. We have witnessed the deliberate destruction of the armed forces, namely the army, air force and navy. One can characterize TPLF as a foreign occupying power for its unequal distribution of wealth and the accumulation of capital towards its ethnocentric scheme. This regime's reckless , uncalculated divide and rule policy has remained detrimental to the unity and territorial integrity of this ancient country. True sons and daughters fear disintegration of the country they love.

Some of the blunders that have been committed by the regime are recoverable. For instance the economy, the unity of the country, the rebuilding of the armed forces, all are recoverable if the Government comes in good terms with the people. The land, the fertile land, that will be given to the Sudan will remain a lost territory once the demarcation is done and signed by our government.

In spite of the loud cry of the Ethiopian people, if EPRDF government turns a deaf ear, it will be a national tragedy and once more we will be the laughing stock of the world.

We know that all evil ideas to weaken Ethiopia emanated from the late Meless Zenawe. His faithful cadres now are in a position to fulfill his will. We advise all his friends and survivors to choose between Meless the **dead** and the country and people **still alive**.

Long live Ethiopia
