

**If The Upcoming Mode of Struggle Remains Unchanged: Get Ready For**

**Another Round Of Arrest And Another Round of Meddling/Negotiations**

By  
Getachew Reda

**SAHEL, Eritrea (1980).** The above picture is evidence of TPLF fighters in Sahel Mountains, in Eritrea. TPLF leaders brainwashed Tigrian youths to fight against their own country, Ethiopia, for the independence of Eritrea.

First Congratulations to all patriotic Ethiopians who showed their best humanity to the most cruel, rude and most anti Ethiopian elements who done tremendous damage to the Ethiopian history, sovereignty and dignity, on which you all paid dearly with your life for the sake of Ethiopia's culture, dignity, history, humanity and justice which at the end made your acceptable genuine intention released you from the Fascist prison in Ethiopia for "now". I salute you!

Having said this, I am sure, some will mumble at me as usual when they read my straightforward commentary that might test salty but natural to come at this time of euphoria.

My commentary always comes at a time when majority of the citizens are in a high euphoria of joy. When Birhanu Mewa ridiculed anyone to associate with armed struggle on VOA, and followed by Andargachew Tsige's preaching a priest alike and ridiculed and dehumanized the people who still believe the possibility of believing to remove Meles with an armed struggle and peaceful struggle (simultaneous) irrationally, in which, I was the first one to comment on both of them, which at the time many hundreds of their followers (kinijjit) started to scream at me in every discussion forum and all over the websites for touching the curtain of their newly arrived "Saints" who came from Ethiopia to the Diaspora community to preach us how we needed to diminish the strength of the struggle of all those who believe in their Ethiopiawinet together against Eritrea's TPLF, OLF and the rest of the confused liberation fronts.

At the time, many website owners declined to post my view, which they later acknowledged their poor perception and their "HO, HO going for educated hooplas (writers) and confused liberation fronts who were the principal guarantor for designing slippery and dangerous tactics that hooked citizens to be trapped and cornered in the face of a dangerous enemy for the last sixteen years. Gradually few patriots and brilliant

citizens realized my view and supported me all the way till we finally witnessed the “Saints” became *the* very first “evil” agents of destroyers of the hottest struggle which was in its Zenith ever, and dragged it down to its knee, at which they both (Berhanu Mewa and Andargachew Tsige and the other their likes) and ended up opened the door of the struggle so widely to the anti Ethiopia armed groups, to the most confused, the most hated, racist, foreign mercenary, to the most stagnant, burnt, spoiled and corrupted leadership ever in African history who never felt ashamed of themselves as part of the black skin continent to degraded themselves when they call Ethiopians Abesha, Habesh, Habesha / considered it as an “insult” to the what it meant “Black” people in the Arabic term, ruddily bragged and proud to be the anti Ethiopia elements calling themselves Oromo, Ogaden, Sidama..... Liberations fronts under the name “AFD” a name given by the Eritrean leadership, ended sucking it up its moisture, and dried its branches and leaves of the struggle “*as they exactly did dried to their own liberation organizations*” for a quarter of a half a century.

Hopefully, such failed quality of perception and elements wont repeat itself again as it was framed before that prevailed a failure. Currently, a new coherent Ethiopian leadership is expected under Dr. Taye or anyone who might come to the front to guide Kinijit. If not, it will be another disaster to the struggle, on which we have to start all over again, that might take us another half quarter of a century

Now, let me come to my main agenda for my commentary. At this juncture, the opposition leaders are released under duress and ordeal of negotiations. Many might devalued their spirit for signing agreement of guilt. That should not be seen as a weakness. Those of us who knew TPLF’s mission and cruelty at least realize that they did a good job for signing the agreement, because that is the only option they have to get out of the hell of the fascist “T” (Eritrean)-PLF darkest prison in Ethiopia governed under Meles Zenawi. What else could they do? The struggle in Ethiopia is hijacked by Meles infiltrators, the struggle of Kinijit and the rest of the struggle in the Diaspora is hijacked and weakened by the other Eritrean slaves, western, and Arab mercenaries calling themselves OLF, ONLF liberation fronts under the name AFD/Kinijit International. So, they had no option but to obey what the Eritrean agents in power in Ethiopia wanted them to do.

Many have died and still suffering in thousands of them in every underground prison cell for refusing to cooperate with a bully bunch of jungle gangs for ingenuity. Of course, though the issue of signing under duress has relevant/ negative consequences to the struggle, the document signed under pressure is not mainly what people should judge. What we have to concern and focus is regarding the development of the future struggle. If the future struggle continues with the same tactic and framework, it will be a chronic obstacle to usefully launch a strong opposition in front of an enemy who is addicted to make himself a supreme, an omnipotence GOD who likes people to beg him with a bribery of promises and negotiations if his wholly GODNESS make people to let go from his hellish hand, under the duress of obeying and kneeling in the hope the released will make his Godness house of parliament to be build more with a color full Umbrellas of decent slaves to imitate and murmur during the meditation and instruction the of the TPLF bible that teaches up to secession be honored in his name under the name of the TPLF the new God of Ethiopia.

(Why blame TPLF's God Meles Zenawi after all for asking his adversaries to beg him and kneel down on his shoe with promise to obey him in the future- Even God of Ethiopia was addicted by the people's promise and gifts of umbrellas and his portraits if he release the beloved one from a tyrant's hand or if he cured his/her son/daughter from illness. So begging, meddling, negotiating, bullying all that was in our nature. So we have it, and we are told the negotiations, meddling and obeying is part of Ethiopia's culture and it will continue with us. For how long? I can't tell you! As long as God asks promises, the Earth bullies will follow his step to act as omnipotence. Man is an ape- it copied what it saw and is acceptable to be a rational culture.)

It is very concerning to me above everything how it will change society and to convince the world and to struggle if the struggle continue with the one tactic designed by an enemy framer who always depend the second chance to hold on to power if he loses a genuine election which he knew by now- forcing, intimidating witnesses and opposition leaders to lie, to sign under a duress circumstances can prolonged his staying in power the only way out, if continue, which will bring tremendous damage to the nation's sovereignty, unity and educated power, ***above all- such trend will produce a demoralized new generation that may be addicted to obey to remove a foreign enemy with negotiations and mediocre settlements that would result further dehumanizing effect on society and dignity***".

To my understandings, the power in Ethiopia is not ***a domestic ETHiopian power*** that is currently ruling the country. It is mercenary, and most ever dangerous enemy to Ethiopian sovereignty and dignity for 16 years opening and allowing the country for all kind of foreign spy agents to tour all over the country under different approaches to easily destabilizing the nation (even sodomize boys allowed to operate in the name of NGO, ever occurred or heard in Ethiopia's history – you have read all the report don't you?). Therefore, the tactic and the strategy needs to add another new additional tactics of struggle simultaneous that never been tried before by the "genuine" "Ethiopian" opposition groups to the peaceful struggle. It is possible to carry it effectively, if all came to agree and believe with one point. And that is? –that the current government leadership in Ethiopia under the name "TPLF" is a mercenary, anti Ethiopia "***jungle-bully***" that entirely needs to be re challenged by all means necessary including by an arm struggle to stop the "***dehumanization***" of Ethiopian elders, educated icons of the nation, mothers, elders in order to reinstate the county's proud history and sovereignty. Ethiopia can't afforded to let these mercenaries destroy its proud history for foreigners to buy lands while citizens can't allow god given rights to have their piece of land and property. (Property right is as you know God given right not government given, hence grounded in the moral order to protect of the universe, which government does not create but rather exists to protect and respect).

My last warning coming this time again, If opposition leaders still failed to carry both peaceful struggle and the armed struggle to coincide them together to bring the struggle to a stable and its meaning of a honorable struggle that would shake an enemy in its knee to bring him to an un-dominated, free of fear and pressure to a rational negotiation table, then I am afraid, I REPEAT, "***if the upcoming mode of struggle remains unchanged: then, take my word, get ready for another round of arrest and another round of meddling/negotiations and repeat arrest, release and re-arrest , re-meddling and***

*another release and another re-arrest cycles*". If such trend continues, I don't know how many arrests and releases and round of negotiations and rearrests and re-meddling would free the country from the omnipotence GOD of TPLF? It is obvious for one thing, that such kneeling of culture in front of mercenary leaders is teaching bad lessons to the new generation. The Lions are still alive, till they might perish one by one by this (TPLF) dangerous enemy Of Ethiopia to deliberately push them to immigrate to live abroad through worn and tearing down their spirit on the course of meddling, re-release and another cycle of endless re-arrests. After all one can only walk so much, in the middle of the course as candle burns and eats itself, man's spirit can only do limited distance. Then it stopped at certain distances. Will the new generation under such new culture hold the torch of strength if addicted to meddling and negotiations in front of mercenary rulers, when there is no gun to defend him while the enemy is well armed up to its teeth? History will tell. // Ethiopia will prevail!!
