International Ethiopian Women's Organization believes that the woman question is a human rights question. It is characterized through its universality because women face all sorts of obstacles irrespective of where they may be in the world. The difficulty in overcoming old fetters is embedded in its longevity since the prejudices have been there since time immemorial.

Ethiopian women's quest for a better world is part and parcel of women's struggle for equality, social justice and democracy. AESED-IEWO will do its utmost to be kept abreast of the activities of women's movements wherever they may be.

In Ethiopia, women face many obstacles. The most outstanding are early marriage, abduction, genital mutilation, human trafficking, modern day slavery etc. For the vast majority this is compounded with poverty, lack of education and limited access to hygienic conditions.
