FINOTE DEMOCRACY RADIO JAMMED BY THE MELES REGIME

This is not the first time that Finote Democracy Radio has been Jammed by the Meles regime but the onslaught this time is extensive. The jamming begun on March 16 (VOA Ethiopian service and Deutschewelle in Amharic were also affected) in Addis Abeba and some regions but by March 20 it has covered all of Ethiopia. The regime's attempt to deny the people the right to know and to get credible news highlights its panic as people in Ethiopia ready themselves for the decisive confrontation with the regime that has brought disaster on them and Ethiopia. Finote Democracy Radio has been one of the most popular, credible and free media for Ethiopians for the last many years.

Finote Democracy calls on all democrats to vigorously condemn the jamming action of the Meles regime and to extend more support and assistance to Finote so that it can overcome the illegal jamming and reach the people with credible news.
